Career Objective

Motivated Artificial Intelligence and Machine Learning undergraduate with hands-on experience in building AI-driven applications, automation workflows, and backend. Skilled in Python, Machine Learning fundamentals, and full-stack AI project development. Seeking an entry-level AI Engineer or software engineering role to apply problem-solving skills, data driven thinking, and continuous learning to real-world industry challenges.

Technical Skills

Languages : Java, Python, C, SQL (MySQL)

Machine Learning & AI: Machine Learning, NumPy, Pandas, RAG (Retrieval-Augmented Generation), LangChain

Automation : UiPath , n8n

Developer Tools & Platforms: Git, GitHub, Google Colab, Linux

Experience

Software Development with AI&ML, Mecandria IT Service and Solutions

Feb 2026 – Apr 2026

- Completed hands-on training in Artificial Intelligence, Machine Learning, and Full Stack Development, including the development of a full-stack business application.
- Gained practical experience in application deployment on remote servers and implementing security measures for secure hosting and protection.

AIML Virtual Intern, Association with Eduskill and Google for Developer.

Apr 2025 – June 2025

- Developed an AI-based interview automation system for organizational use.
- Worked on backend development, API integration, and AI workflow design.
- Collaborated on building a full-stack AI application following industry practices.

Projects

Farm Assist (Agent based Chatbot)

- Developed a bilingual (Tamil/English) AI-powered chatbot using React.js and n8n.
- Integrated APIs and webhook-based workflows for real-time farmer assistance.
- Improved accessibility and user engagement through conversational AI.

Motion Capture using MediaPipe and Unity (Team Project)

- Built a real-time human motion recognition system using OpenCV and MediaPipe.
- Integrated Python-based pose detection with Unity for 3D visualization.
- Enabled real-time movement tracking and interaction.

Achievements

- Earned a Java and Python Badge from HackerRank.
- Solved 160+ problems on various coding platforms.
- Contribute my Story in Anthology Hope's Tapestry, Published by Let's Write Publication.
- Participated in Hackathon conducted by Bhumi-Skilled and ICT Academy.

Education

B.E. in Artificial Intelligence and Machine Learning

K.S. Rangasamy College of Technology, Tiruchengode

Year of Passing : 2027

CGPA: 8.98 (upto 5th sem)

HSC

Sengunthar Matriculation Higher Secondary School, Tharamangalam

Year of Passing : 2023

SSLC

Sengunthar Matriculation Higher Secondary School, Tharamangalam

Year of Passing : 2021

Certifications

- Oracle Certified AI Agentic Foundation Associate (Global Certification)
- Oracle Certified AI Foundation Associate (Global Certification)
- TCS CodeVista Season 13 (Global Ranking 1491)
- Certified from NPTEL Online Course (The Joy of Computing using Python - "Elite")
